## **ROAM ACQUIRES EXCLUSIVE RIGHTS TO TELECOM & POWER PRODUCT LINES**

Roam Technologies has acquired the exclusive intellectual property license for the entire line of telecom and power products formerly produced by Micrin\* Technologies, LLC, United States Radio Frequency (USRF) Corporation, and Micrin Systems.

Roam's license covers all of the most popular products from these companies, including the industry-standard line of Generator Interface Panels (Gen Boxes), the entire range of advanced Power Distribution Units (PDUs), and the Low Noise RF Amplifier Panels. Roam also has exclusive rights to manufacture, market, and sell the High-Current Battery Disconnects, Low Voltage Disconnects (LVDs), Mini-Rectifier Systems (PS/PDUs), Control/Alarm Systems, UPS Systems, Fuse Panels, Temperature-Controlled Cabinets, and Universal Base Units that were previously manufactured and sold by Micrin Technologies, LLC, United States Radio Frequency (USRF) Corporation, and Micrin Systems.

The Intellectual Property (IP) exclusively licensed by Roam may be expressed in the form of: product models & designs, assembly drawings, electrical schematics/circuit diagrams, printed circuit board (PCB) designs and drawings, product specification sheets, mechanical designs and drawings, sheet metal flat patterns, software and firmware designs and source code, bills of material, electrical harness drawings, test fixture designs & drawings, test procedures, silk screen art for products, label designs and drawings, product photographs & illustrations, application notes, trade secrets, installation procedures & instructions, and packaging designs.

We look forward to doing business with your company in the future. Please feel free to call or email us for more information.
